

How to Share Audio from a Video in a Teams Meeting Call

- If you are using the “Meet” function in Teams with your remote and cohort students, and you need to screen share content that includes video, follow the steps below in order to ensure that students at home are getting the audio as well as the video.
- Open the Share Tray icon  and when your options of screens and applications appear, choose the “Include Computer Sound” option to toggle on

- From here, your students at home should see AND hear any audio that is coming from a video clip you're sharing.
